Project

Field(s)	Music, Orchestra, Opera, Music Research
Description	We want to create a sustainable development environment, through music, for our EU neighborhood. Common concerts and culture diffusion will be organised in the partner countries. We will support joined musicians and musical works exchanges, mainly from our local composers. We will create and support our mutual digital archive (recording, filming and scoring) and we will actively support live streaming events through the internet. We will develop educational activities to schools and we will exchange knowledge and experience through our conductors (guest rehearsal visiting). We will produce orchestral and choral music from young conductors and we will promote an intercultural music dialogue to the regions. Finally, we will forward reconciliation, dignity and respect for the refugees by identifying and seeking performers, with whom we will create performing programs both for Europeans and refugees and at the same time enhance their abilities for a better integration in our labour market.
